POLICY TITLE: FIDUCIARY DUTIES

By virtue of the responsibilities assigned to the SIB by North Dakota Century Code Chapter 21-10, the members of the SIB are fiduciaries for ten twelve statutory funds. Through contractual obligations, fiduciary responsibility extends to ten delicational funds. Exhibit E-I lists the funds.

A fiduciary is a person who has discretionary authority or management responsibility for assets held in trust to which another has beneficial title or interest. The fiduciary is responsible for knowing the "prudent requirements" for the investment of trust assets. Remedial actions may be assessed against fiduciaries for violations of fiduciary duty.

North Dakota state law provides broad fiduciary guidelines for the SIB members. NDCC 21-10-07 specifies that "the state investment board shall apply the prudent investor rule in investing for funds under its supervision. The "prudent investor rule" means that in making investments, the fiduciaries shall exercise the judgment and care, under the circumstances then prevailing, that an institutional investor of ordinary prudence, discretion, and intelligence exercises in the management of large investments entrusted to it, not in regard to speculation but in regard to the permanent disposition of funds, considering probable safety of capital as well as probable income."

Procedural prudence is a term that has evolved to describe the appropriate activities of a person (or persons) who act in a fiduciary role. Court decisions to date indicate that procedural prudence is more important in assessing fiduciary activities than actual portfolio performance. A fiduciary cannot be faulted for making the "wrong" decision provided that proper due diligence was performed.

POLICY TITLE: FIDUCIARY DUTIES

The key to successfully discharging the SIB's fiduciary duties is the establishment of and adherence to proper due diligence procedures. While not bound by ERISA (Employee Retirement and Income Security Act of 1974), the SIB will use the procedural prudence outlined by ERISA as guidance in developing its procedures:

- 1. An investment policy must be established for each fund and must be in writing.
- Plan assets must be diversified, unless under the circumstances it would be prudent not to do so.
- 3. Investment decisions must be made with the skill and care of a prudent expert.
- 4. Investment performance must be monitored.
- 5. Investment expenses must be controlled.
- 6. Prohibited transactions must be avoided.

Policy Implemented: September 20, 1995. Amended: May 30, 1997; January 22, 1999.

E.1 (contd.)

The SIB believes that an investment program must be built and managed like any good business, with a clear statement of mission, overall objectives, roles and responsibilities, and policies and guidelines. Major issues to be faced by the SIB will revolve around:

Asset allocation targets:

- Setting appropriate benchmarks.
- Finding the right managers.
- Monitoring the program.
- Searching for appropriate new opportunities.

To ensure rigorous attention to all aspects of the investment program, the SIB follows an established investment process. This process, described by the diagram on the following page, involves three phases:

- Investment policy development/modification.
- Implementation/monitoring.
- Evaluation.

The first column of boxes describes the policy development phase, the middle column implementation/monitoring, and the last box on right evaluation. Activities associated with internal entities are shown along the top. Those associated with external entities are shown along the bottom. The middle shows activities that internal and external entities work on together.

Diagram E-2.1 here		

POLICY TITLE: KEY PROGRAM ENTITIES AND RESPONSIBILITIES

The key responsibilities of the entities involved in the investment program are:

Fund Governing Bodies

- 1. Establish policy on investment goals and objectives.
- 2. Establish asset allocation.
- 3. Hire actuary when required.

SIB

- 1. Invest funds entrusted by statute and contracted entities.
- 2. Set policies on appropriate investments and investment practices for entrusted funds.
- 3. Approve asset allocation and investment policies of participating trust funds.
- 4. Report the investment performance of the funds to each fund's governing authority.
- 5. Hire and terminate money managers, custodians, and consultants.

Investment Officer and RIO Staff

- 1. Implement investment policies approved by the SIB.
- 2. Provide research and administrative support for SIB projects.
- 3. Recommend investment regulations appropriate for governing the investment of entrusted funds.
- 4. Assist fund governing bodies in developing asset allocation and investment policies.
- 5. Evaluate money manager adherence to investment objectives.

POLICY TITLE: KEY PROGRAM ENTITIES AND RESPONSIBILITIES

- 6. Provide performance reports to the SIB and boards of participating funds.
- 7. Recommend hiring or terminating money managers, custodians, consultants, and other outside services needed to effectively manage the investment funds.
- 8. Develop and maintain appropriate accounting policies and systems for the funds entrusted to the SIB.

<u>Investment Consultant</u>

- 1. Measure money manager performance and monitor adherence to investment goals, objectives, and policies.
- 2. Conduct annual evaluation of program policies and results, and assist in development of annual work plan.
- 3. Assist in implementation of annual work plan.
- 4. Conduct asset allocation or asset/liability studies.
- 5. Conduct requested money manager searches.
- 6. Assist in development of investment policies and manager structure and rebalancing guidelines.
- 7. Extension of staff for special projects.

Actuary

- 1. Assist fund governing bodies in developing benefit and funding policies.
- 2. Measure actuarial soundness of plan.
- 3. Perform experience studies as requested by plan sponsor. Provide liability projections as needed.

POLICY TITLE: KEY PROGRAM ENTITIES AND RESPONSIBILITIES

- 4. Provide liability projections as needed.
- 5. Conduct annual evaluation of program policies and results, and assist in development of annual work plan.
- 6. Assist in implementation of annual work plan.

<u>Auditor</u>

- 1. Measure, validate, and offer an opinion on agency financial statements and management.
- 2. Assist in developing appropriate accounting policies and procedures.
- 3. Bring technical competence, sound business judgement, integrity, and objectivity to the financial reporting process.

Master Custodian

- 1. Provide safekeeping of all securities purchased by managers on behalf of the SIB.
- 2. Provide global custody services.
- 3. Collect interest, dividend, and principal payments in a timely manner.
- 4. Provide for timely settlement of securities transactions.
- 5. Price all securities and post transactions daily.
- 6. Maintain short-term investment vehicles for investment of cash not invested by SIB managers. Sweep all manager accounts daily to ensure all available cash is invested.
- 7. Provide monthly, quarterly, and annual accounting reports for posting to RIO's general ledger.

POLICY TITLE: KEY PROGRAM ENTITIES AND RESPONSIBILITIES

- 8. May manage a securities lending program to enhance income.
- 9. Provide electronic access to accounting reports.
- 10. Provide other services that assist with the monitoring of managers and investments.

Portfolio Managers

- 1. Manage portfolios as assigned by the SIB.
- 2. Provide liquidity, as required, in a timely and costefficient manner.
- 3. Vote proxies.
- 4. Provide educational assistance to board.

Exhibit E-II lists the key program entities.

POLICY TITLE: INVESTMENT POLICY DEVELOPMENT - TRUST FUNDS

All funds under SIB management must have a written investment policy. Investment policy forms the cornerstone of the management of any investment program. A sound investment policy ensures that fund assets are managed in a disciplined process, based on long-term fundamental investment principles.

For the larger, more complex trust funds, consultants are used to assist in policy and asset allocation development. Their specialized skills are needed to model and analyze the many variables that go into determining a proper asset allocation.

Policy development starts with the specification of investment objectives, constraints, and preferences. Fund trustees must address a number of factors:

- What is the fund's objective(s)?
- What is the board's tolerance for risk or threshold for under-performance?
- What are the fund's liquidity needs and cash flow characteristics?
- What are the board's asset class preferences and constraints?
- What is the actuarial earnings assumption?
- What are the legal or political considerations?
- What is the investment time horizon?

Since the ultimate objective of fund investments is to provide for the payment of future capital needs, claims, or other monetary requirements, it is essential that the investment policy be developed within the context of fund liabilities or spending policy. The development of investment policy, therefore, is always unique to the circumstances of each fund.

POLICY TITLE: INVESTMENT POLICY DEVELOPMENT - TRUST FUNDS

Complex actuarial models are used to quantify the liabilities of the pension plans and Workers Compensation Fund Workforce Safety and Insurance. Internal entities develop cash flow forecasts for the smaller funds based on past claims or anticipated expenditures.

Asset allocation optimizations are used to quantify the range of future investment outcomes. Investment consultants contribute needed expertise on capital market expectations and in identifying the risks associated with a particular asset allocation.

For some funds, the risk/return tradeoffs of alternative portfolios are not well represented by expected returns and standard deviation. More important are the expected results for required sponsor and participant contributions and funded ratios over time. Asset/liability modeling is the tool that allows the governing boards to examine and assess the tradeoffs leading to an appropriate investment policy.

The results of the optimizations are a description of the range of financial results that might realistically be expected to occur. These results provide the basis for determining an asset allocation.

In accordance with NDCC 21-10-02.1, RIO staff works with each fund's governing authority, and consultants as needed, to develop an investment policy, which includes an appropriate asset allocation, for each of the statutory funds. Contracted entities are responsible for their own policy development.

Each policy, as a minimum, will include the following information:

- 1. Fund characteristics and constraints.
 - An explanation as to the purpose of the portfolio and its legal structure.
 - Size of portfolio and the likelihood and amount of future contributions and disbursements.

POLICY TITLE: INVESTMENT POLICY DEVELOPMENT - TRUST FUNDS

- Participant demographics when applicable.
- Fiscal health of fund.
- Constraints.
- Unique circumstances.
- 2. Responsibilities of SIB
- 3. Investment objectives.
- 4. Standards of investment performance.
- 5. Asset allocation policy and guidelines.
- 6. Evaluation and review.

POLICY TITLE: INVESTMENT POLICY DEVELOPMENT - INVESTMENT POOLS

The SIB does no in-house investment of funds. All investment activity is delegated to outside money managers. Within each asset class there are numerous manager styles (i.e. market sector specializations) that may be employed by the SIB to effect exposure to the various asset classes. Exhibit E-III lists and defines the manager styles currently in use.

SIB investment pool policy statements will define the following for each asset class:

- 1. Strategic objectives.
- 2. Performance objectives.
 - Appropriate capital market benchmarks.
 - Excess return targets, after payment of investment management fees.
 - Peer-group ranking.
 - Risk characteristics.
 - Termination factors.
- 3. Portfolio constraints.
 - Quality of securities/portfolio (security BAA/ portfolio AA).
 - Quantity held (maximum in company/industry/economic sector).
 - Other specific restrictions if applicable (ADRs, 144A securities, prohibited transactions, etc.).

POLICY TITLE: INVESTMENT POLICY DEVELOPMENT - INVESTMENT POOLS

- 4. Investment structure.
 - Percent of assets per manager style.
 - Ranges for rebalancing.
- 5. Control procedures.
 - Duties and responsibilities of the SIB.
 - Duties and responsibilities of money managers.
 - Reporting requirements.

POLICY TITLE: MONITORING

The SIB will ensure that appropriate monitoring mechanisms are in place at all times. The three basic mechanisms are:

- Accounting
- Auditing
- Performance Measurement

The primary objective of these functions is to provide useful information to decision makers (fiduciaries and legislators). These monitoring functions are needed to keep track of assets and manager activity and to control the asset mix. Different aspects of these activities will be conducted internally by RIO staff and externally by the master custodian, auditors, and investment consultants.

Accounting

The master custodian will provide RIO staff with such accounting detail and at such frequency as the staff deems necessary to fulfill the SIB's reporting requirements.

From this information, RIO accounting staff will generate monthly and annual financial statements for each of the trust funds managed by the SIB.

Auditing

The North Dakota State Auditor is responsible for the external audit of RIO. They may assign this responsibility to an outside firm which they select by way of the RFP process. The SIB Audit Committee may make recommendations to the State Auditor concerning the selection, evaluation, and termination of this firm. This firm conducts an extensive financial and management audit for each fiscal year. The audited financial statements are filed with the Legislative Audit and Fiscal Review Committee.

POLICY TITLE: MONITORING

RIO has a dedicated internal audit function that reports to the SIB Audit Committee. The internal audit function encompasses both the investment and retirement divisions of RIO. The primary responsibilities of investment auditing will may include testing interest and dividend payments to ensure earnings are properly received; determine compliance with SIB policy, state law, and applicable federal laws and regulations; test compliance of investment managers with proxy voting responsibilities; and review security transaction costs. The SIB Audit Committee has oversight responsibilities as outlined in the SIB Audit Committee charter.

Performance Measurement and Reporting

The third element of monitoring entails measuring the performance of the individual investment managers and the total fund performance of each of the funds under the SIB. The SIB will retain reputable investment consultants or performance measurement services to provide comprehensive quarterly performance measurement information. This information will include data on the capital markets, other plan sponsors, and other investment managers. Performance results for SIB accounts will be calculated from data provided by the master custodian and compared to relevant capital market benchmarks, other public funds, manager peer groups, and investment goals specified in the asset class investment policy. Time periods covered by the report may vary but generally will include the most recent quarter, last 12 months, last three years, five years, and longer time periods (as data is available).

RIO staff will use appropriate sources to compile monthly performance reports for each of the funds under the SIB that show recent performance and asset mix.

POLICY TITLE: PROXY VOTING

STATEMENT OF POLICY

It shall be the policy of the State Investment Board (SIB) to vote all proxies appurtenant to shares held in the various plans administered by the Board, and to vote said shares in a manner that best serves the system's interests. Specifically, all shares are to be voted with the interest of preserving or enhancing share value. The Board endorses the Department of Labor opinion that proxies have economic power which shareholders are obligated to exercise to improve corporate performance. The Board further recognized that proxy issues are frequently complex, requiring expert guidance; accordingly, it has adopted procedures that employ such experts.

The objectives of these policies are as follows:

- 1. Exercise the value empowered in proxies.
- 2. Maintain or improve share value for the exclusive benefit of the participants.
- 3. Achieve changes for the common good whenever these do not conflict with the exclusive benefit objective.

PROCEDURES

DISTINCTION OF RESPONSIBILITIES

Master Custodian

The system's master custodian shall be responsible for timely receipt and distribution of proxy ballots to the appropriate investment management institutions.

POLICY TITLE: PROXY VOTING

<u>Managers</u>

The managers shall be responsible for promptly voting all proxies pursuant to the Board's policies, and in keeping with the managers' best judgements.

Staff

Staff, in concert with the master custodian and the managers, shall be responsible for monitoring the receipt and voting of all proxies.

Board

The Board shall administer and enforce its policies. This administration and enforcement requires reporting from responsible persons, as discussed in the following.

REPORTING

Master Custodian

The master custodian shall report monthly quarterly in writing on all pertinent proxy issues, including (1) receipt of proxy material; (2) nature of issues; (3) due date; (4) names of managers and dates forwarded; and (5) deficiency reports covering proxies that should have been received but were not.

Managers

Managers shall report quarterly in writing on how proxies have been voted, with explanations given whenever the Board's guidelines have not been followed.

POLICY TITLE: PROXY VOTING

Staff

Internal audit staff shall report annually on the efficiency of the process, the portion of total proxies that have actually been voted, and compliance with Board directives.

GUIDELINES

The Board believes that good corporate investment decisions require good corporate governance, and that social responsibilities cannot be ignored in these decision processes. Accordingly, the practice of faithfully voting with management will *not* be tolerated, nor will the "Wall Street Rule" which advocates the sale of shares if there is disagreement with management.

In keeping with the Board's philosophy, the managers are encouraged to vote *for* proposals that *increase* or enhance the following, and against those that decrease or diminish the same:

- Health of the population
- Environmental conditions
- Management and Board accountability
- Abolition of management entrenchment
- Control of executive compensation
- Shareholder rights and ownership
- Fair labor practices

Guidelines may be altered periodically by the Board as situations warrant.

POLICY TITLE: IMPLEMENTATION - INVESTMENT MANAGER SELECTION

The SIB hires investment managers with the intention of maintaining long-standing relationships. Care is taken to select managers for defined roles based on their strengths in designated areas. The hiring process is done in accordance with all applicable state and federal laws.

Some manager selections are conducted by the consultant while others may be directed by the staff in coordination with the SIB board. Ultimately, The selection process is often a team effort involving the investment consultants, SIB members, and RIO staff. A consultant is may be invaluable in this activity due to the large volume of data that needs to be collected, verified, and summarized. Also, their ongoing dialogue with money management firms provides useful qualitative input.

The investment management business has rapidly evolved since the 1990's. It is recognized that many viable firms have been formed as the result of spin-offs or start-ups and may not have a traditional long-term investment performance history in accordance with the following guidelines. There has also been a tremendous increase in the types of strategies available to institutional investors resulting in the need for flexibility in the establishment of investment criteria. Subject to the case-by-case acceptance of deviation by the SIB members, Mmoney managers must meet the following minimum selection criteria for inclusion in a manager search:

- Must be a registered investment adviser, bank, insurance company, or investment company (mutual fund). Should provide ADV Part II (registered investment adviser) prospectus (investment company) or comparable information (bank or insurance company).
- Provide at least five years of actual quarterly performance data that is time weighted, a representative composite of accounts, and meets <u>AIMR standards</u> <u>Global Investment Performance Standards (GIPS)</u>.

POLICY TITLE: IMPLEMENTATION - INVESTMENT MANAGER SELECTION

• Provide information that illustrates the key investment personnel have been together for at least five years and the capabilities of the firm can handle the current level of investment activity.

- Able to articulate the firm's investment strategies and philosophy in a manner understandable by the Board, and provide a statement that the strategy has been followed for at least five years.
- Disclose any pending or past litigation or censure.
- Be willing to acknowledge their fiduciary status in writing (mutual funds are exempted from this requirement).

The following steps will be followed in the selection process, subject to modification relative to investment strategy and manager search circumstances:

• Develop a profile of the type of manager needed. This is base on the investment goals and asset allocations. Included in the profile are such things as: investment style, five and ten-year performance numbers, number of clients (in particular public funds), professional staff, assets under management, clients lost/gained over past year, and fees.

<u>Quantitative characteristics</u>, <u>such as GIPS-compliant composite return data</u>, <u>risk-adjusted rates of return and relevant portfolio characteristics</u>.

Qualitative characteristics, such as key personnel, investment philosophy, investment strategy, research orientation, decision making process, and risk controls.

Organizational factors, such as type and size of firm, ownership structure, client servicing capabilities, ability to obtain and retain clients, and fees.

POLICY TITLE: IMPLEMENTATION - INVESTMENT MANAGER SELECTION

• The Investment Officer will give a written report to the SIB on the due diligence process conducted by the Investment Officer, RIO staff, and the SIB in the manager selection process. This report will include selection steps followed and process steps excluded.

- Consultant <u>and/or staff</u> uses the profile to screen their data base for managers that meet SIB criteria.
- Consultant $\frac{\text{and/or staff}}{\text{candidates}}$ reduces the group to the top $\frac{10-15}{\text{contain pertinent data}}$ on each of the candidates.
- The SIB/committee reviews the report with the consultant and narrows the field to about five finalists.
- When appropriate, the list of finalists is narrowed to two or three, and on-site visits are may be made by staff and board members to the candidates' home offices. Visits by board members to potential manager sites must have board approval.
- When appropriate the Investment Officer will conduct factfinding pre-interviews. SIB trustees and RIO staff will receive notice of these pre-interviews.

Interviews are conducted with each of the finalists in Bismarck. All are required to bring the potential portfolio manager to the interview. Particular attention is paid to gaining an understanding of the investment process and determining the manager's compatibility with the SIB's guidelines and objectives.

The Investment Officer will schedule manager interviews with the SIB. Following these interviews, the Investment Officer, with the advice of RIO staff and consultants, will make recommendations to the SIB on manager selection.

POLICY TITLE: IMPLEMENTATION - INVESTMENT MANAGER SELECTION

- The SIB will select the investment manager by majority vote.
- * RIO staff, with the help of the consultant and under committee direction, prepare a final report and recommendation for the SIB.
- Manager(s) selected by the SIB are notified immediately by RIO staff. Unsuccessful candidates are notified by consultant.
- Investment management contracts are reviewed and finalized, sent to the Attorney General for approval, and executed.
- Accounts are set up at the master custodian and on the internal general ledger.
- Consultant is notified when to begin the measurement of the investment performance of the manager(s).

POLICY TITLE: IMPLEMENTATION - PORTFOLIO REBALANCING

Portfolio Rebalancing

The need to rebalance the portfolio can arise due to a new asset allocation or because market activity has driven the actual distribution of assets away from the desired mix. To minimize transaction costs due to rebalancing, RIO works with the investment consultants to determine appropriate ranges around the target mix (which are specified in the policy statement). Rigidly adhered to, such a policy is a valuable risk control tool. By maintaining asset mix within reasonably tight ranges, the SIB avoids making unintentional "bets" in the asset mix and avoids market-timing decisions.

All of the funds the SIB oversees have an asset allocation with minimum and maximum limits assigned. RIO's rebalancing policy requires the asset mix to be determined at the end of each month. At the end of each quarter, all portfolios deviating from the target beyond the acceptable limits are rebalanced to target.

POLICY TITLE: EVALUATION

The SIB will follow an annual evaluation cycle for the investment program to ensure systematic review of investment policies and performance results and the development and implementation of corrective action plans. Evaluation of the program seeks to answer such questions as:

- Are all investment goals being met?
- What has worked and what has not?
- Have changes occurred in the capital markets, plan design, or board philosophy to warrant changes in investment policy?
- Are money managers meeting our expectations?
- Is continued confidence in the money managers warranted?
- Are accounting practices sound and fair to participating funds?
- Is service delivered in the most cost-effective manner?

The SIB's consultants play a key role in helping to answer some of these questions. The external auditor's report provides insight on accounting practices and cost effectiveness.

Evaluation of Money Managers

Achievement of the SIB's performance goals hinges on the success of the investment strategies and money managers it employs. Evaluation of each money manager must consider the following:

- Has the manager achieved the SIB's performance objectives?
- Has the firm adhered to the investment philosophy for which it was hired?

POLICY TITLE: EVALUATION

• Have there been any organizational or personnel changes that may negatively affect future performance?

- Are areas of concern being adequately addressed?
- Can the manager perform well in the future, regardless of whether extraordinary events, long-term performance, and/or short-term performance argue for termination?

These criteria are assessed by quantitative and qualitative means:

- Analyses provided by the investment consultant.
- Annual meetings with each manager in Bismarck to discuss performance, investment philosophy, organizational changes, economic outlook, and areas of concern.

Longer periods of time are better than shorter time periods when assessing a manager's performance. Ideally, performance should be assessed over a market cycle. Market cycles have varying lengths but have historically averaged 5-7 years. The SIB will use a minimum five-year period to evaluate manager performance against long-term performance standards. Long-term performance standards will be a market index that the manager has previously agreed to be measured against.

Shorter-term performance standards will also be established for each money manager. These standards will incorporate a minimum three-year measurement period and measure the manager against a previously agreed-upon peer group or style market index.

Long-term performance standards, short-term performance standards, extraordinary events, and termination factors will be incorporated in the written asset class investment policies.

Evaluation of Program Costs

Costs will be broken out by internal administration, investment consultants, master custodian, and external manager fees. Reports will detail this information by investment pool, managers, and by fund.

These costs will be compared to other funds on an annual basis. The most reliable source of comparison currently available is the cost survey prepared by the Canadian consulting firm Cost Effectiveness Measurement, Inc. The information contained in this survey is not available anywhere else. Staff is encouraged to identify other cost-comparison sources.

- POLICY TITLE: PENSION TRUST ASSET ALLOCATION POLICIES

The following are the asset allocations for the Pension Trust and will be used to place assets with investment managers and portfolio rebalancing:

DOMESTIC LARGE CAP EQUITY (30.1% of the total trust)

60% enhanced index, 15% structured growth, 15% structured value and 10% core index.

DOMESTIC SMALL CAP EOUITY (9.9% of the total trust)

100% manager of managers

INTERNATIONAL EQUITY (14.7%)

60% large cap core active, 10% large cap concentrated, 10% large cap index, 10% small cap value, 10% small cap growth

INTERNATIONAL EMERCING MARKETS (4.8%)

100% emerging markets fund

DOMESTIC FIXED INCOME (16.7%)

20% active core bonds, 10% convertible bonds, 10% BBB average quality bonds, 25% passively managed bonds, 35% timberland

HICH YIELD BONDS (5.8%)

100% active management

INTERNATIONAL FIXED INCOME (5.0)

100% active management (core)

REAL ESTATE (6.8%)

100% commingled real estate funds.

```
PRIVATE EQUITY (4.8%)

CASH (1.5%)

100% in custodial bank short term investment fund (STIF).

Policy Implemented: September 20, 1995.

Amended: July 28, 2000, December 10, 2004.
```

```
- POLICY TITLE: INSURANCE TRUST ASSET ALLOCATION POLICIES
The following are the asset allocations for the Insurance Trust and
will be used to place assets with investment managers and portfolio
rebalancing:
DOMESTIC LARGE CAP EOUITY (10.7% of the total trust)
     60% enhanced index 15% structured growth, 15% structured value
     and 10% core index.
DOMESTIC SMALL CAP EQUITY (5.3% of the total trust)
  100% manager of managers
CONVERTIBLE BONDS (6.1% of total trust)
 100% active core
INTERNATIONAL EQUITY (5.1% of the total trust)
     80% large cap core active, 10% small cap value, 10% small cap
     <del>growth</del>
DOMESTIC FIXED INCOME (43.4% of the total trust)
     50% passively managed bonds, 25% active core bonds, 25% BBB
     average quality bonds
TIPS (20.9%)
 100% Treasury Inflation Protected Securities
REAL ESTATE (5.7%)
 100% commingled real estate funds
CASH (2.9% of the total trust)
    100% in enhanced money market demand account.
Policy Implemented: September 20, 1995.
Amended: November 2, 1997; January 22, 1999, August 18, 2000,
December 10, 2004.
```

POLICY TITLE: PERFORMANCE RELATED INVESTMENT MANAGER REVIEW

The North Dakota State Investment Board (SIB) recognizes the inherent importance of assessing an investment manager because of performance. Thus, the following process of evaluation includes quantitative and qualitative input. This procedure is structured to assist the SIB in recognizing potentially distressed investment managers, initiating a formal review process, and providing guidelines for termination if necessary. Note: The "Manager Review" terminology or concept is not meant to cause the manager to make substantive changes in investment philosophy, style, or strategies. Rather, it is intended to define a period of close scrutiny of the manager's activities, circumstances, and investment results.

Factors which may result in a Manager Review:

Significant changes in organizational structure

Significant changes in investment philosophy

Significant deviation in portfolio management from stated philosophy (style drift)

Substandard investment performance

Diminished confidence in manager

Manager Review Procedures:

Information is submitted to, or generated by, the Board which initiates consideration of a Manager Review.

If warranted, the Board takes action to initiate a Manager Review.

Based on the situation and with input from the Investment Director, the SIB suggests appropriate action to facilitate the Review. Action may include telephone conferencing, local or on-site visits with manager, investigation by consultants, appearance of manager before a select committee of the SIB, or appearance of the manager before the SIB. Investment Director initiates investigation of situation based on direction from SIB.

POLICY TITLE: PERFORMANCE RELATED INVESTMENT MANAGER REVIEW

The Investment Director reports findings to SIB at a subsequent meeting.

After considering findings of the Manager Review, SIB may:

Remove manager from Review status

Suggest additional action to facilitate Manager Review

Relieve manager of duties

In the case where continued investigation is warranted, the Investment Director will report new information and/or recommendations to the SIB as appropriate. It will be considered the responsibility of the Investment Director to maintain awareness and consideration of the Review until the situation is resolved.

It is important to recognize that situations occasionally arise of such a serious nature that a Manager Review process must be immediately initiated. In such cases, the Investment Director is granted the authority to place an investment manager under Review, including the freezing of assets if necessary, and report on such action at the next meeting of the State Investment Board.

In every case, the Investment Director is responsible for documenting the Manager Review process including recognition of:

Reason of Manager Review

Action taken to investigate the situation

Report on results of investigation

Report on resultant action taken by SIB

Notification of investigation and conclusions to manager and consultants

A complete record of Manager Review activities and history shall be maintained at the ND Retirement and Investment Office.

Policy Implemented: June 27, 1997.

POLICY TITLE: BANK OF NORTH DAKOTA MATCH LOAN PROGRAM

The SIB has committed \$40 million (\$25 million from the Pension Trust and \$15 million from the Insurance Trust) a commitment to the Bank of North Dakota Match Loan Program. The purpose of the program is to encourage and attract financially strong companies to North Dakota. The program is targeted to manufacturing, processing and value-added industries.

The SIB provides capital to the program by purchasing Certificates of Deposit (CD's) from the Bank of North Dakota. The CD's are guaranteed by the state, typically have seven to fifteen year maturities and pay interest pegged to US Treasury notes.

The source of funding for CD's shall be determined by the Investment Director; that funding to be from the most appropriate source consistent with liquidity and relative yield and return objectives and constraints.

Policy Implemented: April 24, 1998.
